Michael Freeman

Junior Developer

10922 Adelaide Court, Charlotte NC 28213   mikef132044@gmail.com

860-941-2346

Highly motivated and skilled Junior Developer with a passion for learning and problem-solving. Proficient in the programming language JavaScript, with experience in developing full stack web applications and troubleshooting problems. Strong team player with excellent communication skills and a proven ability to adapt quickly to new technologies and frameworks. Seeking to contribute my technical expertise and enthusiasm for coding to a dynamic development team.

Education

MERN Stack in JavaScript February 2024 - Present
University of Connecticut at Storrs, CT

Learning JavaScript from the ground up with UCONN's EdX coding bootcamp

in Business Finance | September 2018 - December 2021

Robert E. Fitch Senior High School at Groton, Connecticut

Key Skills

- **React**
- **JavaScript**
- **Node.js**
- **MongoDB**
- **Express.js**

Projects

Indie Ignite

A platform for Indie Developers to be seen, using Handlebars and mySQL I took the front-end lead to make this project look modern and stylish with an amazing user interface.

Debate Cafe

Using React and MongoDB, my team and I created a debate platform for users to interact and discuss topics, I took on React Lead for this project.

Aniname

My team and I created a website to track down their favorite shows, or discover new shows, and create a list to keep track of what they are watching, or what they want to watch! Using basic HTML, CSS and JavaScipt, we developed an easy to use site with great visual appeal.
